HISTORIE:

The Company Štěpán Robek - Robex was established on October 12, 1994 as a legal entity specializing in the production of and trading in shearing, cutting, and tailoring equipment for sewing workshops and tailor's shops. Gradually, the Company's backbone program oriented on the production of laying tables, band saws, single-purpose machines, on the cutting of various kinds of materials in a strip or with lamination; on transfer machines, expanded material (foam plastic) crushers, and PUR foam recycling lines. During the eleven years of its existence, the Company with its main offices in Dvůr Králové nad Labem developed partner contacts with many engineering companies, thus being capable of participating in joint projects for the demanding production of customized machines and equipment designed for varied fields of manufacturing. Due to the statutory obligation to adapt double-entry bookkeeping, the Company established and has ever since simultaneously operated – on March 4, 2005 – the Company Robex DK, s. r. o., which is mainly active in the area of production, yet takes part in commercial activities as well. As the history of the newly founded company is relatively short, we would like to request that you consider our lists of references from the period when the company was operated as a natural person. At present, the Company's principal activities fall within the fields of trading, customized production of machines for the textile industry, production operation shops for the processing of foam plastics, upholstery shops and many others. The Company has its own designing office, which markedly reduces the costs of production. In the course of its existence the Company ROBEX DK, s. r. o. also assumed responsibilities as a research and development center servicing many branches of industry.

OUR BUSINESS AND PRODUCTION:

Purveyance chaff-cutter (circular and **verical**) producer KM, **HF**, **CSEPEL**, **HOOGS**, **SULEE**, **YJ** e.g., **splint**, **tag** and **tager pistols** (notation) brands **Dennison®**, **Banok®**. Further **marker** machinery, fusing chaff-cutter, accessories running, knives, whetstone to the of all type chaff-cutter and belt drunk, bazaar, set, band saw, regarded desks **with automatic**, saw for textile, flexible foam and **Molitan®**. Cutting in moulding and chaff-cutter give upon portal. Splinter automata, baler, conveyer and silo, grinder, recycling.
